FAQ 36

Who is ONDULINE®? 38

Onduline® DIY solutions for your house and gardening

Made by John with ONDUVILLA®

“ONDUVILLA® offered a complete system including matching accessories and all the tools I needed. I’m thrilled with the result. Now when guests come over, I’m happy to show off my new roof. And I’m happy to say I did it myself!”

John. 39. Builder.

PATIO & EXTENSION

Made by Julia with BARDOLINE®

“Finally, a practical roofing solution that’s reliable and very easy to figure out. BARDOLINE® was a breeze to install. If I can do it, anyone can!”

Julia. 29. Florist.

CARPORT

Made by Leonard with ONDUCLAIR®

“We wanted to improve the insulation and lighting sections of our carport. A neighbour suggested ONDUCLAIR® sheets. Not only they were a great choice and surprisingly simple to install, but they were available in various materials.”

Leonard. 37. Marketing Manager.

The importance of DIY by Jean-Noel Fourel, CEO

We have many key points in common, most notably a strong desire to ensure end-customer satisfaction and a strategy that places them at the center of our actions, which include offering them high quality solutions and services as well as the most adapted communications and tools.

Do-it-Yourself is a very important market for Onduline. So important, in fact, that we’ve decided to invest in a completely new marketing and sales approach that leverages retail business environments. We’ve also implemented **dedicated teams** to deliver the highest level of support to our retail partners, and we’re convinced that this collaboration will be our ultimate success story.

Our long-term goal is to establish and foster dynamic, lucrative and, most of all, durable **long-term partnerships** with all of our retailer partners.

When it comes to quality, we look far beyond the products themselves. Our drive for **innovation** brings a positive impact on the most critical levels of service. And that includes a **robust logistics service** to always get the right products to the right place at the right time.

This year, we are embarking on this completely new marketing and sales approach, unique for the Do-it-Yourself market, with the ‘Made by Me’ slogan, which will allow all of us to **grow our business together**.

We are investing to help you sell more. So let’s work together and make the most of this growth opportunity!

Sincerely,
Jean-Noël Fourel

INSTALLATION INSTRUCTIONS

Only for 3D colors finished

1. Start the installation in a direction opposite to the prevailing winds. Start the fixing from the eave. The overhang has to be max 5 cm. To prevent the penetration of wind driven rain, snow and birds fix ONDUVILLA® foam fillers.

2. Stagger the rows, by starting the second row with a half tile. Ensure proper waterproofing by aligning the overlapping guides.

3. The aesthetics and wind uplift protection can be optimized by using the verge element accessory, which is fixed first on the sidewall, then as well on the top of the corrugation.

4a. Ensure watertightness at ridge by applying the ONDUVILLA® foam fillers, on both sides of the ridge line.

4b. Cover the ridge with the Slim cap and fix it on each side of the roof, through the foam fillers, on top of the corrugations. The direction of the overlap is opposite to the direction of the prevailing winds.

5. Finish the ridge with the Closure cap element for better aesthetic and better waterproofing.

1.0 ROOFING

Black	1234567890123	1234567890123	5412520701919	3467670015715

INSTALLATION INSTRUCTIONS

1. Start laying sheets over the gutter line with max 7 cm overhang, lay sheets in the opposite direction to the prevailing winds.

The second row has to be started with half a sheet cut parallel to the corrugations, to misalign side overlaps.

2. Approximately 20 fixings should be used per sheet. Every corrugation should be fixed at eaves, overlaps and ridges. Every second corrugation has to be fixed at the intermediate purlins. The fixing at the intermediate purlins has to be staggered.

3a. The ridge element has to overlap the ONDULINE® sheet min 12 cm.

3b. The ridge elements are fixed in opposite direction to the prevailing winds.

Black	3467670018938	5412520701919	3467670015715

INSTALLATION INSTRUCTIONS

1. Laying in staggered rows avoids the superposition of 4 sheet thicknesses at overlap points. Always start your first row below the gutter, leaving maximum 7 cm overhang. Begin the second row with half an ONDULINE® EASYLINE sheet (cut lengthwise) and carry on with complete sheets.

2. Sheets must be fixed onto each of their supporting battens. Every corrugation should be nailed at eaves, overlaps and ridges. Every second corrugation has to be fixed at the intermediate purlins. The fixing at the intermediate purlins has to be staggered.

3a. The ridge element has to overlap the ONDULINE® EASYLINE sheet min 12 cm.

3b. The ridge elements are fixed in opposite direction to the prevailing winds.

1.0 | ROOFING

ONDULINE® EASYLINE

Easy to install, ONDULINE® EASYLINE sheets are light and, due to their dimensions, they are perfectly suitable to be used on small canopy roofs.

INSTALLATION INSTRUCTIONS

1. Installation is done on full wooden decking only (thickness >24 mm). For pitches < 35% is recommended to install a previous protection layer. Prepare base course cutting lengthways tile tabs. The eaves course is then bonded to the adhesive tabs of the base course.

3. If needed shorten the first left (or right) strip by half a tab. On completion check the tile bonding, use adhesive to reinforce laps as required.

2. Use five 20 mm large headed galvanised nails per shingle. Nail through strip centre band and into the top edge of the lower course.

4. To complete the ridge line, start always cutting shingles to make the ridge (see 4a).

Make sure that the bitumen shingles are sufficiently covered on both sides of the roof. The direction of the overlap is made in the opposite direction to prevailing winds (see 4b).

1.0 ROOFING

BARDOLINE® CLASSIC

Quality shingle for all kind of roof applications. Large choice of color and shapes. Well-known reliability.

GENERAL INFORMATIONS

PVC
Light transmission

PRODUCT ADVANTAGES

- Good light transmission
- Excellent light transmission and UV resistance (UV protection on both sides)
- 3 year warranty for light transmission and impact resistance (PVC SG 0,8 mm)
- No warping between -20 & +60 °C
- Euroclass C-s3, d0

PROFILES

PO, GRECA, GO

APPLICATIONS

Shelters, pergolas, annexes...

PLR (Polyester)
Impact resistance

- Filtered light effect for good light distribution
- Translucent, bringing a smooth, well-distributed and filtered light effect
- Excellent impact resistance, high mechanical resistance with the association of polyester resin and fibreglass
- 10 year warranty for light transmission and impact resistance.
- No warping between -30 & +120 °C
- Euroclass E

PO, GO

Cladding, annexes...

PC (Polycarbonate)
Impact resistance + UV

- Aesthetics, comfort and protection thanks to excellent light transmission and good durability
- Excellent impact resistance (hailstorm)
- UV resistance on external side
- 10 year warranty for light transmission and impact resistance
- No warping between -40 & +130 °C
- Fire Resistant: Euroclass B-s1, d0 In compliance with norm EN 13501-1: 2002

INSTALLATION INSTRUCTIONS

ROOF SLOPE

The slope and the loads (snow in particular) define the distance between the purlins.

Type	PO - 76/18	GRECA - 75/18	GO - 177/51
Minimum roof slope	14° (25 %)	14° (25 %)	14° (25 %)
Distance between purlins	Max. 110 cm 	Max. 138 cm 	Max. 138 cm
Side overlap	2 corrugations 	2 corrugation 	1/2 corrugation
End overlap			

Sheets should be laid so that the side laps are away from prevailing wind. Start installation at eaves first, ensuring proper overhang (max. 7 cm).

Purlin position & corrugation fixing depend on profile:

Fixation at min. 50 mm from the end of the sheet.

PVC Sheets: all supports covered with PVC sheets have to be painted in a light color, preferably white to limit heating. The PVC sheets must not be installed as dual walls or over-roofing.

Polyester sheets: in fixing points, pre-drill holes with a diameter of 2 mm larger than fixing element.

PVC and Polycarbonate sheets: pre-drill holes with a diameter of 4 mm larger than the fixing element.

Spacers or saddle supports: the use of spacers (profile support) avoids crushing the sheet when tightening. **No use of PVC washers with PC sheets.**

Cautions:

- Sheets must not be stored and transported in direct sunlight.
- Continuous ventilation under the sheets, from the eaves to the ridge is vital.

1.0 ROOFING

PC MULTIWALL

Double and triple layered, for uses such as skylights roofing and covering buildings, swimming pools and glazing.

BENEFITS

- Excellent thermal insulation.
- Controlled daylight transmission.
- Flame retardant.
- Highly flexible and easy to install.
- Lightweight.
- UV blocking layer.
- Environmentally friendly.

TECHNICAL CHARACTERISTICS

	PC Multiwall Transparent		
Dimensions	200 - 300 x 105 cm	200 - 300 x 98 cm	200 - 300 x 98 cm
Thickness	6 mm	10 mm	16 mm
Nr of layers	2	2	3
Light transmission	82 %	82 %	74 %
Weight per m ²	1,3 kg	1,7 kg	2,7 kg
N° sheet per pallet	50 pcs	50 pcs	50 pcs

INSTALLATION INSTRUCTIONS

Minimum slope: 15 %

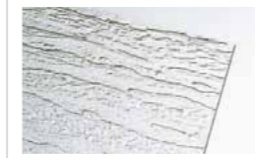

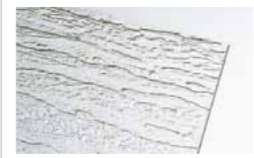

Cautions: Stock sheets in an area not exposed to the sun or direct heat from the sun. Sheets are supplied with a coloured protective film on upper side. Protective side to be faced toward the sun. Do not remove this film until the installation is complete.

1. Install main profiles on the purlins, then end and intermediate profiles.
2. Set up adhesive tapes on the top and the bottom of the panel.
3. Install the sheets, walls parallel to the direction of the slope, with the coloured face towards facing the sky.
4. Install the cover caps by clipping. Add a water tight seal on the ridge for the 10 mm sheets.
5. Set up U profile on sheet end.
6. If necessary, use a silicone seal to ensure watertightness between sheets and wall.

1.0 | ROOFING

ONDUGLASS®

Synthetic glass plate for interior design (extruded polystyrene) or outdoor (acrylic), like partitions and windows.

BENEFITS

- Stronger and more economical than glass.
- Twice as insulating as glass.
- Transparent.
- Easy to work (with traditional tools).
- Protected by a polyethylene film on the smooth side.

TECHNICAL CHARACTERISTICS

Thickness	2 mm, 4 mm
Density	1,19 g/cm ³
Light transmission	92 % (2 mm Transparent Plain)
Modulus of elasticity	3200 mPa

2.0

WATERPROOFING AND FOUNDATION

Foundations, walls, terraces, flat and pitch roofs, with the wide range of products offered by ONDULINE®, you have always a solution to protect successfully your building from water, rain and moisture.

Made by Daniel
with BITULINE®

Made by Janny and Bob
with ONDUCOAT®

“ In my country house I had several moisture and infiltration problems. With BITULINE® I waterproofed the cement roof and walls of my box, while with the liquid membrane ONDUCOAT®, I've easily repaired the terrace. Now I've a long time of serenity. ”

Janny. 28. Housewife. |

TECHNICAL CHARACTERISTICS

2.0 | WATERPROOFING AND FOUNDATION

BITULINE®

Torch-on and self-adhesive waterproofing membranes.

BENEFITS

BITULINE® CLASSIC

- Effective waterproofing.
- Broad range of products & colors.
- UV resistant.

BITULINE® FIRST

- Effective waterproofing.
- Broad range of products.

BITULINE® ADHESIVE

- Safe application.
- Fast and easy installation.
- Lightweight.

2.0 | WATERPROOFING AND FOUNDATION

ONDUTISS®

Waterproof foil to protect the whole underroof.

BENEFITS

- Protection against infiltration of powder snow and dust.
- Temporary protection of roofs.
- Prevention of roof condensation (diffusion of water vapor).
- Underroofing layer to increase the roof watertightness.

INSTALLATION INSTRUCTIONS

For ONDUTISS® AIR Breathable Membrane

1. Roll out ONDUTISS® AIR in parallel with the gutter, starting from the bottom, always the printed side facing up. The membrane can be laid directly on the thermal insulation with slight tension.

2. Fix the bands directly to the rafters with a stapler. Nail counter batten on top of the membrane through to the rafters to protect the fixing area.

3. In case of any protruding element, cut ONDUTISS® AIR across the width and turn up on the protruding elements (chimneys, ventilations, windows etc.). Fix ONDUTISS® AIR with ONDUTISS® sealing tape.

NOTE: For other types of membranes and detailed fixing guide, please visit www.onduline.com

ONDUBAND® EASY

A multipurpose bituminous adhesive tape, for sealing penetrations, minor repairs on roofs, flashing of chimneys.

BENEFITS

- Multipurpose use, flexible application.
- Easy to use: just use a cutter or shears.
- Excellent adhesion to most substrates.
- Design that easily blends in with your surrounding.

TECHNICAL CHARACTERISTICS

Length	5 m
Width	5 - 7,5 - 10 - 15 - 30 cm
Thickness	1,1 mm
Weight per m ²	1,55 kg/m ²

INSTALLATION INSTRUCTIONS

1. Clean the substrate.

2. Use ONDUPRIMER® if the substrate is porous.

3. Cut ONDUBAND® to size with a cutter or shears.

4. Remove the silicone film on the back of the band.

5. Mount on the whole surface.

2.0 | WATERPROOFING AND FOUNDATION

FONDALINE®

Protective and drainage cladding for subterranean walls. High density polyethylene membrane designed to protect buried walls and bitumen membranes.

BENEFITS

- Exceptional long lasting in the time, creating an air sealing between the membrane on the wall and the soil, which allows optimal consolidation of the basement.
- Effective resistance (to attack of roots, fungi, bacteria, shock and pressure of backfill).
- Excellent frost resistance.

TECHNICAL CHARACTERISTICS

Length	20 m
Width	100 - 150 - 200 - 250 cm
Weight per m ²	400 g/m ²

1 m x 20 m	3467670009684	Box of 15 rolls
2 m x 25 m	3467670009707	Box of 6 rolls

INSTALLATION INSTRUCTIONS

PEDESTRIAN PAVING PATHS

1. Create a 10 to 20 cm recess in the ground, depending on the type of paving used. Even out any slope and compact.

2. Unroll the geotextile and spread a coat of sand at least 5 cm thick over it.

3. Tap in and adjust the paving using a rubber mallet.

GRAVEL ALLEYS

1. Create a 10 cm recess in the ground. Even out any slope and compact.

2. Unroll the geotextile and spread a coat of gravel at least 5 cm thick over it.

3. Enjoy your new long-lasting gravel alley.

FAQ

ONDULINE® RECOMMENDS:

- **Ventilate the roof:** keep an air flow under the roof as there is a natural concentration of humidity below the roof.
- **Take care of the minimum recommended slope** to facilitate the water run-off:
 - ONDUCLAIR® Ribbed: 7 % (4°)
 - ONDUVILLA®: 15 % (9°), ONDULINE®: 9 % (5°), BARDOLINE®: 27 % (15°) Rectangular, 36 % (20°) Beaver & Triangular
 - ONDUCLAIR®: 25 % (14°) (PO & Greca).
- **Use the appropriate quantity of fixing** to ensure a better resistance to wrenching:
 - ONDULINE®: 10 fixings / m²
 - ONDUVILLA®: 16 fixings / m²
 - BARDOLINE®: approximately 35 nails / m².
- **Maintain regularly your roof** for a better durability: remove vegetation and leaf debris, take care of evacuations, accessories and structure, and maintain continuous ventilation.

GENERAL QUESTIONS

What warranty offers Onduline®?

In normal installation and usage conditions, Onduline® product warranty is:

- **ONDUVILLA®:** 15 years Waterproof
- **ONDULINE® CLASSIC:** 10 years Waterproof
- **BARDOLINE® CLASSIC & ONDULINE® EASYLINE:** 5 years Waterproof
- **ONDUCLAIR®:** light transmission and impact resistance
 - PVC: 3 years waterproof (PVC SG 0,8 mm)
 - PLR (Polyester): 10 years waterproof
 - PC (Polycarbonate): 10 years waterproof.

What are the fixings used with Onduline® solutions?

- Wood support:
 - Universal screw with pressure washer, saddle support, sealing, washer (sketch)
- Metal support:
 - Universal screw with pressure washer, saddle support, sealing washer
- On concrete:
 - Wall plug + screw with pressure washer, saddle support, sealing washer.

What is the time needed to install Onduline® solutions? (estimated time for 1 person installing on a standard and simple surface)

- ONDUVILLA®: 7 m²/hr (including components).
- ONDULINE®: 9 m²/hr.
- BARDOLINE®: 5 m²/hr - 1 ml/hr for ridges and valleys.

SPECIFIC QUESTIONS PER PRODUCTS

BARDOLINE®

What are the tips to know to ensure proper installation?

Plan 15 % shingles more for the ridge and the starter row (that has to be installed upside down, see installation guidelines), 35 nails/m² and 1 ONDUMASTIC® glue cartridge for 6 m².

ONDUVILLA®

Does it crack and corrupt in hot and cold weathers?

ONDUVILLA® tiles may be applied both in the most cold and most hot and humid climates easily. No problems have been encountered in applications made in areas where the temperature was +50°C under shadow and in regions where the cold was almost -50°C.

Does its color change?

ONDUVILLA® is affected slightly by UV. However, due to the coloring process, this change is not felt and it preserves its color for many years.

What is the minimum pitch?

The minimum pitch is 15 %, with the use of a full deck or 30 % for a batten structure.

What are the tips to prepare the installation?

A pack of 7 tiles covers a useful surface of 2.17 m². Fixings are not included in the pack. About 13 fixings are needed per m².

How can ONDUVILLA® be installed on wood batten?

In that case, the maximum width distance between purlins is 32 cm.

How to install a gutter to an ONDUVILLA® roof?

A gutter can be installed, provided it is not fixed directly on the tiles, but on the structure.

ONDUTISS®

What is the difference between a bituminous membrane and a breathing membrane?

- A bituminous membrane has to be ventilated on each side (above/below).
- A breathing membrane can be directly installed on the insulation and ventilated on the upper side.

ONDUCLAIR® Plastic range

What is a single-skin sheet?

It's a sheet composed of a single thin wall.

What is the difference between Transparent, Crystal and Opal?

- Transparent: one can see the shape, not the colour.
- Crystal: one can see shape and colour.
- Opal: one can't see shape nor colour.

What are the classes for Polyester (PLR)?

	Norm	Min glass fibre/m ²	Average thickness (mm)
Do-it-yourself work	Class 1	270	0.8 (+/- 0.09)
Wall cladding	Class 2	350	1.0 (+ 0.14/- 0.10)
Roof / Cladding	Class 3	450	1.3 (+/- 0.14)
Roof / Cladding	Class 4	580	1.7 (+/- 0.25)

What is the fire performance?

- Polyester (PLR): Euroclass E
- PVC: Euroclass C-s3, d0
- Polycarbonate (PC): Euroclass B-s1, d0

What is the light transmission?

- Polyester (PLR): 80 %
- PVC Crystal: 85 %
- PVC Opal: 65 %
- Polycarbonate (PC) Crystal: 90 %
- Polycarbonate (PC) Opal: 66 %

What are the installation rules (maximum purlin distance, overlapping and fixing)?

	Ribbed	Higher corrugations	Smaller corrugations
Side overlap	1 corrugation	1/2 corrugation	2 corrugations
End overlap	150 mm	150 mm	150 mm

To avoid the plastic deformation when fixing, set up a distance spacer between the support and the sheet at the fixing point.

Who is Onduline®?

Established in **1950**

Worldwide **leader**
in lightweight roofing

More than **60** years
of industry experience

More than **1,600** employees
and **43** nationalities

Sales of **348** million Euro
turnover in 2012

10 plants in **9** countries,
fully certified

Present in over **100** countries
via **42** subsidiaries

Over **150** million m²
of roofing solutions sold every year

The Onduline® brand was born in France back in 1950 with the introduction of our first cellulose-bitumen-based roofing solution and under-roofing material. Over the next half century, we expanded rapidly across Europe and, more recently, throughout South America, East Asia and North America. Today, Onduline® delivers high-performance products and award-winning roofing solutions **to more than 100 countries worldwide**. And in addition to our long-time focus on professionals, we've also adopted a specialized approach for our Do-it-Yourself customers, offering the same level of professional quality.

We don't see ourselves as just a manufacturer. We see ourselves as a dedicated partner that combines first-rate services with **long-term vision**. Our core values include simplicity, reliability and a firm commitment to quality and innovation, backed by solid investment in R&D.

And through our first-rate logistics service, our local sales force offers **easily accessible stock** and **timely delivery**.

So be sure that we talk to you as a **strong DIY partner**.

Whatever the need, Onduline® is determined to deliver **Protection above all**. That means protecting our end-customers, protecting your profits, and protecting our environment, all at the same time!

All for you!

Local
sales force

Just a phone call away!

Integrated R&D

Production quality

Reliable logistics
